

KeyCrib

A Secure and Simple Solution to Dispense Keys After Hours

Rugged plate steel construction for durability and security

Easy to use, easy and safe for your customers to use

Laminated steel doors are designed to resist theft

Keys accessed through combination lock, which you reset after each use

Available in multiple door formats to fit your needs

Available in various formats— Wall Mounted, Free Standing or Integrated onto all KeyKeeper Withstand freestanding models

KeyKeeper KeyCrib offers a secure, simple and cost-effective method of dispensing keys. Key Crib can be wall mounted in both interior and exterior applications or integrated into your freestanding KeyKeeper models. Easy to install, KeyCrib requires no electricity. Your customer opens their access door using the combination code you supply them, after keys have been retrieved, change the combination quickly and easily for the next use. KeyKeeper KeyCrib increases customer satisfaction and convenience by allowing your customers to do business with you at times that fit their needs.
